Solar

It can solar charge under water so it does not consume electricity. For each hour of exposure to the sun you will have an hour of lighting after dark, reaching an average of 7 hours illumination.

No cables required

Adheres to any type of pool surface such as tile, liner, polyester or painted, both in chlorinated water and saline. It is fixed directly to the wall of the pool under water with the supplied adhesive. In less than five minutes, you will enjoy your illuminated pool from the first night.

Compact design which produces a large, well-lit area

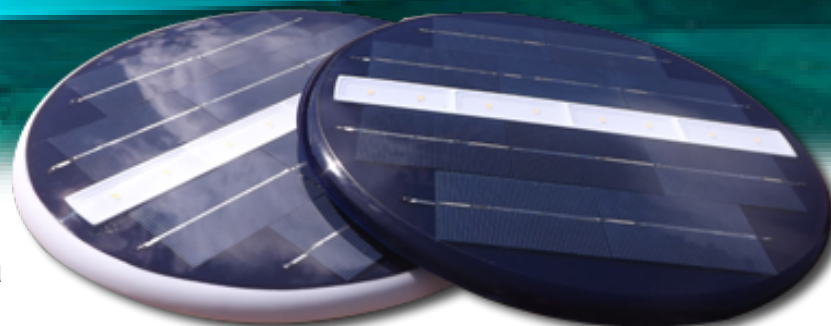

With a diameter of 308 mm, a thickness of only 12 mm and a weight of 1.2 kg, each unit can illuminate an area of 15 to 20 meters.

Blue or white only
